

Not-for-profit Services

UNLOCK SUCCESS
THROUGH TECHNOLOGY

Not-for-profit organisations' main priority is to help others. The difficulties that organisations working in this sector face are heavily impacted by their lack of resources.

Relying heavily on donations, fundraising, and grants, rather than sales, means that most companies are hesitant when it comes to spending. Although budgets are tight, the importance of quality IT support should not be underestimated.

By hiring a team of industry professionals to manage specialty subjects, such as IT, managers can focus their time on raising awareness and securing funding.

Sector Challenges

Some of the challenges that the not-for-profit industry face include:

FINANCES

This difficulty is faced by all non-for-profits. Funded heavily by grants and donations, every pound spent needs to be used wisely and to show a return on investment. This is why companies that operate in this sector usually avoid staying up to date with technology and processes.

MODERN WORKING PRACTICES

The changing work environment, such as a shift the to flexible working, means that not-for-profits need to have the practices in place to keep staff engaged and motivated; no matter where they are.

OUTDATED TECHNOLOGY

Not-for-profits usually cut on spending so that the money can go to the people or cause that they support. This means that technology and software implemented is sometimes older or outdated, which can often lead to data breaches and security threats.

A PASSIONATE, PROACTIVE AND RELIABLE
TEAM OF IT EXPERTS LOCATED IN ABERDEEN,
GLASGOW, EDINBURGH AND INVERNESS.

DEDICATED PROACTIVE AND REACTIVE SUPPORT

MICROSOFT 365

Microsoft 365 is a complete solution that allows for employees to work collaboratively and securely from anywhere.

A combination of Office 365, Windows 10 and Enterprise Mobility + Security, the package allows for your firm to operate in a modern and secure workspace.

MICROSOFT TEAMS
